

PROJECT HIGHLIGHTS FROM 50 YEARS IN THE DOE OFFICE OF SCIENCE

A scientific symposium in honor of Claus Rode

July 21, 2016
JEFFERSON LAB
3 - 5:30 p.m.

This symposium will highlight a selection of high-profile projects completed in the Department of Energy's Office of Science over the last 50 years. The character and execution of scientific projects evolved significantly during this time. This period covers the distinguished career of Claus Rode, who was involved in all of the projects discussed while working at several Office of Science laboratories.

Presentations

Projects on the Prairie (*Roger Dixon*)

Startups in the Office of Science can happen:
CEBAF an exciting example (*Tony Chargin*)

CEBAF Beams and MSU Cryo (*Richard York*)

ORNL Spallation Neutron Source (*Norbert Holtkamp*)

CEBAF 12 GeV (*Allison Lung*)

Reception to Follow

Anticipated attendees include Jerry Draayer, Hermann Grunder, Christoph Leemann, Dan Lehman, Ed Temple, and others.
