

GlueX & CLAS

- Searching for $\eta\pi^-$ channel in order to investigate exotic mesons production
- Seen at GlueX; ongoing partial wave analysis

GlueX & CLAS

- Searched for $\gamma + p \rightarrow \pi_0 + p$ reaction at GlueX
- Discrepancies in beam asymmetry were found between GlueX & SLAC results

GlueX & CLAS

- Searched for $e + p \rightarrow e + \pi^0 + p$ reaction in CLAS.
- 2γ system invariant mass and proton missing mass are shown, respectively.
- Cinematic selections were implemented to get a better Shot/Noise ratio for the proton peak.
