Randall Munroe earned a degree in physics from Christopher Newport University. Prior to launching his webcomic, XKCD, he was a NASA roboticist and programmer. A stick-figure comic, XKCD explores the themes of computer science, technology, science, mathematics, language, pop culture and romance.

In the past Munroe has spoken at MIT, Princeton, University of Illinois at Urbana-Champaign, Worcester Polytechnic Institute, Carnegie Mellon, Dartmouth, Yale and Google's Mountain View offices. **Now he comes back to CNU!**
