

University of New Hampshire  
Department of Physics

The Nuclear and Particle Physics Group at the University of New Hampshire invites applications for a postdoctoral research associate. The successful candidate will take a leading role in our Jefferson Lab Spin Structure program. They will also have the opportunity to contribute to the Heavy Photon Search, and to propose and initiate new experiments.

The position is available immediately and will remain open until filled. This is a one year appointment, which will be renewed for additional years, contingent upon available funding and satisfactory performance. Candidates are required to have a PhD in experimental nuclear or particle physics by the appointment start date. Experience in spin-dependent structure function analysis and/or polarized targets would be an asset.

Applicants should send a curriculum vita and summary of relevant research experience, and arrange for three letters of reference to be sent to Prof. Karl Slifer (karl.slifer at unh.edu). Inquiries may be sent to the same address. The group's efforts are supported by the US Department of Energy. The University of New Hampshire is an equal opportunity employer. Candidates of both genders and all ethnicities are strongly urged to apply.
