

XXXVIII International Symposium on Physics in Collision PIC2018, September 11th – 15th 2018, Bogota, Colombia

Dear Colleagues,

The XXXVIII International Symposium on Physics in Collision (PIC2018) will be held in Bogota, on 11th-15th September 2018. This is a conference whose focus is to update key topics in elementary particle physics in which recent results have been presented.

Invited speakers will give plenary reviews on current topics in elementary particle physics and astrophysics with the aim of encouraging informal discussions of new experimental results and their implications.

We invite the particle and astroparticle physics community and experiments to submit abstracts for poster presentations. The deadline for abstract submission is 1st June, 2018. In the conference webpage, <https://indico.cern.ch/event/pic2018> you can find information about important dates and fees, as well as other constantly updated information on the symposium.

A reduced fee will be charged to participants from Latin American institutes in an attempt to boost participation from nearby countries and in such a way to promote particle physics in the region.

We are looking forward to seeing you in Bogota.

PIC2018 Organizing Committee
