

27th International Workshop on Deep-Inelastic Scattering and Related Subjects

1st BULLETIN

The 27th International Workshop on Deep-Inelastic Scattering and Related Subjects will be held in Torino (Italy) on 8-12 April, 2019.

The meeting covers a wide range of topics related to Quantum Chromodynamics and Deep Inelastic Scattering, as well as a general survey of the hottest subjects in high energy physics. The program is mainly devoted to the most recent results from large experiments at BNL, CERN, DESY, FNAL, JLab, and KEK, and to their theoretical and phenomenological implications. Emphasis will be given to the future of DIS, in terms of possible future facilities and physics reach.

The workshop consists of plenary and parallel sessions, the latter being organized into 7 working groups:

- WG1) Structure Functions and Parton Densities
- WG2) Low x and Diffractive Physics
- WG3) Higgs and BSM Physics
- WG4) Hadronic and Electroweak Observables
- WG5) Physics with Heavy Flavours (charm, beauty and top)
- WG6) Spin and 3D Structure
- WG7) Future of DIS

Important dates

- Registrations open on December 5th 2018
- Abstract submissions open on December 5th 2018.
- The deadline for abstract submission to the parallel sessions will be February 20th 2019
- The deadline for the early registration fee will be February 28th 2019

Registrations

Registrations are managed by the INDICO system at CERN at the link <https://indico.cern.ch/event/749003/registrations/>

Abstract submission

The abstract submission is managed by the INDICO system at CERN at the link <https://indico.cern.ch/event/749003/abstracts/>

To submit an abstract, a CERN INDICO Account is required. Abstract submission deadline: February 20th 2019.

More information

Detailed information can be found via <http://dis2019.to.infn.it> or directly at the Indico page <https://indico.cern.ch/event/749003/>.
