

**First Circular: Symposium**  
**Nucleon and Nuclear structure from Inclusive measurements**

**Date:** June, 20-21, 2023

**Venue:** Virginia Tech Physics Department, Blacksburg, VA

This two-day event aims at bringing together the nuclear physics community to discuss recent progress and results in measurements of structure functions in inclusive reactions, at Jefferson Lab and other facilities. We will discuss recent experimental results (e.g. MARATHON, BONuS, F2 etc.) and their interpretations (e.g. PDF fitting), as well as new opportunities. We will also discuss the future of inclusive measurements at Jefferson Lab and beyond.

The symposium will be hosted by the Virginia Tech physics department and will be held in-person, with a possibility to attend remotely. If you are interested in participating, please contact one of the organizers.

Participation is free of charge. Limited support for lodging is available on a first ask - first serve basis.
