

Faculty Positions in Physics at HUST

Major faculty expansion for all fields of physics has recently been approved in the Department of Physics at the Huazhong University of Science and Technology (HUST <http://www.hust.edu.cn>).

HUST is among the most prestigious universities in China. It was initially established as an engineering college in 1952, then rapidly became a comprehensive university that includes physical sciences, engineering, medical sciences, etc. The Department of Physics currently consists of 94 faculty members and more than 1000 undergraduate and graduate students. Our research activities cover all fields of physics.

As a crucial effort to promote its science research and education, HUST has recently decided to significantly expand its physics faculty in the next few years. A large number of open-rank faculty positions are now available for all fields of physics. For distinguished physicists, such as (and not limited to) those who are qualified for the national program of “1000 Talents Plan” or “Junior 1000 Talents Plan” (cf. <http://1000plan.org/>), the salary and start-up funds are very competitive and comparable to those at US universities. We will also make extra efforts to help new faculty members with relocation, including on-campus housing and school for children.

Collaboration with former institutions is strongly encouraged; this includes our support for continuation of research at the former institution as a visitor, if necessary.

Applicants should demonstrate excellent academic records. Post-doctorial experience is highly desirable, but exceptionally outstanding new Ph.Ds may be considered. Applicants should send a cover letter and an updated curriculum vitae with three names of references to physics@hust.edu.cn.

We also appreciate it if you recommend to us candidates who may be interested in the positions. For any additional information, please feel free to contact:
