

**Research Assistant Professor**  
**University of Washington – Department of Physics**

The Nuclear Theory Group at the University of Washington invites applications for a fulltime Research Assistant Professor in theoretical nuclear physics for an anticipated appointment beginning in 2016. This is a non-tenure track position with a 3-year appointment, renewable for up to 5 years total depending on performance.

Although the candidate will be primarily engaged in research activities, all University of Washington faculty may engage in teaching, research and service. Applicants should have a PhD (or foreign equivalent), post-doctoral experience of at least 12 months, a documented record of research achievements, and an established record of publications.

Current group research interests include QCD, many-body theory, nuclear reactions at high and low energies, weak interactions and symmetries, effective field theory, heavy quark physics, lattice QCD, nuclear astrophysics, and nuclear structure. For more information see:

<https://sharepoint.washington.edu/phys/research/ntg/Pages/default.aspx>

Interested candidates should submit a CV, a list of publications, a research statement, and three letters of reference (as PDF documents) to: [kgh@uw.edu](mailto:kgh@uw.edu) Subject line: RAP 2016 or applicants may apply via Academic Jobs Online (<https://academicjobsonline.org/ajo/UW/NTGroup/RAP>). Any questions may be directed to Professor Gerald Miller: [miller@uw.edu](mailto:miller@uw.edu).

*Priority will be given to applications received before December 1, 2015. The University of Washington is an affirmative action and equal opportunity employer. All qualified applicants will receive consideration for employment without regard to race, color, religion, sex, sexual orientation, gender identity, national origin, age, protected veteran or disabled status, or genetic information. This posting will remain open until filled. Application review will begin in January 2016.*
