Modular Dry Cabinet

Outstanding performance

A cabinet that grows with your demand, the MSD series is the first modular dry cabinet that can be expanded as your storage and drying needs increase.

Incorporating our extremely powerful U-5000 series dynamic drying unit, the basic MSD can be expanded to 4800 litres without the need for additional drying units.

Regeneration times are reduced due to the closed loop control of the drying unit which automatically responds to atmosphere and frequent door openings, while delivering precise humidity control to $\leq 0,5\%$ RH with traceability to a computer or network.
