

We put all our equipments in the BNL boxes
kept in front of the test beam computing room
The boxes are not fully closed
so that Bob will be able to reorganize

Extra DAQ

Rest of the equipments we put inside the detector set up enclosure and the door is closed.
Had the last table with **LAPPD** enclosed in **Pelican** cases is also removed from the area.
AI block is retired to the place it was belonging to.

The outside area of the detector enclosure is clean now!!

LAPPD: enclosed in Pelican case, ready for the shipment
TODO : will be sending out the survey slides soon,
Junqi might be having the LAPPD resistivity data
