Select VARGRID, then Project SNSPPU. Select a traveler is populated.

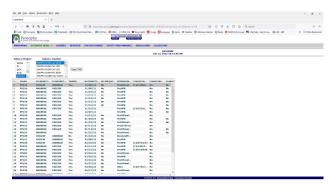

Want now to select three travelers (will press CTRL while selecting travelers):

SNSPPU-CHEM-CAV-DEGR

SNSPPU-CLNRM-CST-LEAK

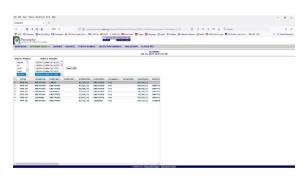

SNSPPU-VTA-CAV-VTRF

After CAV-DEGR this screen is displayed

Press CTRL and try to select the second traveler (SNSPPU-CLNRM-CST-LEAK)

And now I have this screen:

Next traveler is VTA RF. KEEP CTRL down and select the 3rd traveler

Something seems to be different.

Will start again, selecting from the chem traveler cavity PPU-032 (sec 22) and will like to have

More data from Leak (no, leak is for string, lets use only VTA) and pick up sequence 97, also pressing CTRL.

Nothing happens when I press PPU032 (seq.97) . Shall I click just Excel / PDF?

When I click Excel, I get this file, with ALL VTA cavity tests.

Probably I am doing something wrong: I am interested only to data mine only PPU032

And to follow data collected in Chem, the Clean room and VTA travelers.

Maybe I should not use VARGRID. What is the intention for VARGRID?
